

PARTH JADHAV

Web Designer & Full Stack Developer (Java)

+91-8080887466 | parthkjadhav15@gmail.com | linkedin.com/in/parthjadhav | github.com/Parth15-hub | Ravet, Pune

PROFESSIONAL SUMMARY

IT Engineering student (3rd year, SGPA: 8.3) at PCCOE with hands-on experience in Python, Java, SQL, and full-stack web development. Built AI-powered applications, including an NLP resume analyzer and data-driven automation tools. Completed NPTEL Java Programming certification and a front-end internship integrating REST APIs in agile teams. Passionate about building elegant web interfaces and robust Java-based full-stack solutions, with a strong eye for design, clean code architecture, and delivering seamless user experiences from frontend to backend.

TECHNICAL SKILLS

Automation & AI: Python Scripting, Machine Learning, NLP, Generative AI, API/JSON Integration, Copilot Studio (learning)

Programming & Web: Java (Spring Boot), JavaScript, React, HTML/CSS, SQL, Git/GitHub, REST APIs, Process Mapping & Documentation

EXPERIENCE

Front-End Developer Intern | Walstar Corporation

May 2025 – June 2025

- Built responsive web UIs using HTML, CSS, JavaScript, and React; integrated REST APIs with JSON data for workflow automation.
- Mapped current UI workflows across 3 agile sprints, documented UX requirements, and prioritized 12 improvement items for delivery.
- Executed unit tests for 20+ UI components, logged 30+ defects, and maintained Git/GitHub version control in agile cycles.

PROJECTS

- AI Powered Resume Analyzer [Python, NLP, ML, Flask]** – Built an NLP-driven tool that parses resumes, extracts key skills, and scores candidates against job descriptions using ML classification and AI-assisted text analysis to automate manual screening.
- Smart Invoice Management [Java, Spring Boot, React, SQL, REST API]** – Developed a full-stack invoice automation system with Java backend, React frontend, and SQL database; automated invoice generation, tracking, and status updates via REST APIs.
- Skincare Recommendation Engine [Python, ML]** – AI-powered product recommender using data preprocessing and classification models, applying Python scripting for data-driven automation.
- E-Learning Platform [Full Stack, REST API]** – End-to-end platform with user authentication, REST API integration, and database management; mapped and automated multi-step onboarding workflows.
- Fintech Business Consultant Website [React, API]** – Dynamic web portal with API connectors and automated data rendering, architected a responsive web portal that mirrored complex integration workflows, enhancing data rendering speed by 20% and improving user experience.

EDUCATION

B.E. Information Technology Engineering – PCCOE, Pune

2023 – 2027 | SGPA: 8.3 | CET: 96.67%ile

Higher Secondary Certificate (HSC) – Shahu Vidyalaya College

2021 – 2022 | 12th Board: 74% | 10th Board: 90%

CERTIFICATIONS & ACHIEVEMENTS

NPTEL – Java Programming Certification | Smart India Hackathon 2024 & 2025

CORE STRENGTHS

• UI/UX Design & Prototyping • Java Full Stack Development • React • REST API Design & Integration • Spring Boot Backend • SQL & Database Management • Git/GitHub Version Control • Cross-functional Teamwork • Continuous Learning
